

JEM 7-series – The Investment

All amounts per pair and VAT included

The JEM 7-series have an unique thick walled inert cabinet made out of solid hardwood. A very rigid platform that allows its drivers to deliver the music against a deepblack backdrop. Low frequencies are rendered with the precision of a closed system but with the extension of a transmissionline. The cabinet is completely faceted to maximize stereo imaging capabilities. The cabinet and most other parts are all handmade in my own workshop and available at JEM Design only.

M7s Reference monitor

My reference in high definition, neutrality and range. Multiple proprietary technologies such as RAS™ (Residual Anomaly Suppression). Filter topology implemented towards driver integration and retainment of (micro)dynamics, resulting in very lifelike presentation.

SEAS Excel 6.9 inch Magnesium woofer, Accuton 25mm Corundum tweeter. Paper in Oil capacitors and Copperfoil inductors for unstrained and fluid reproduction and ultra low noise floor. Highest quality user adjustable tweeter level (standard 0, +1 and +2dB) Efficiency 86dB/1W @8 Ohm.

- Solid wood Walnut ----- € 11.800,- --- In Stock ---
- Solid wood Dark Eucalyptus----- € 10.800,- --- In Stock ---
- Solid wood Dark Eucalyptus----- € 10.800,- --- In Stock ---
- Tweeter attenuation expansion set 1dB € 140,-
(available: -2, -1, +3 +4 and +5 dB)

ST70 Zero

Zero Reflection stands for 7-series. Minimal frontal surface to retain imaging performance. Solid wood, industrial aluminium, stainless steel. Height 70cm. Interchangeable carbon feet with M8 fixation.

- Walnut ----- € 2.400,-
- Solid wood Eucalyptus or Hevea----- € 1.900,-
